

DESCRIPTION:

- ND Stay-Put provides temporary, dependable retention for fasteners or other components prior to & during the assembly process. ND Stay-Put offers "customized fastener retention solutions" that allow the fastener(s) to be held in place (in most cases without affecting the end assembly) while an operator easily completes the joining process. Call today for an expert "efficiency analysis" by ND's experienced engineers and see how Stay-Put will ensure the most efficient end product fabrication possible.

FEATURES:

- Temporary Fastener Retention:** ND's Stay-Put allows the fastener(s) to be held in place while an operator easily completes the assembly process.

- Unit Adhesion:** ND Stay-Put can also be used like a glue, bonding a number of auxiliary components together.

- Pre-Assembled Auxiliary Components:** Utilize ND Stay-Put to combine numerous parts or auxiliary attachments into one easy-to-utilize unit.

Loose fit

Tight fit

FEATURES (Continued):

- Speeds Assembly:** By combining auxiliary attachments, Stay-Put reduces the quantity of parts involved and difficulty of assembly processes.
- Reduces Part Numbers:** Pre-assembled auxiliary attachments have the added benefit of combining part numbers.
- Reduces Operator Fatigue:** Stay-Put increases overall procedural ergonomics and decreases the number of tasks required to assemble the end product.
- Increases Quality Control:** With pre-assembled auxiliary attachments, utilizing Stay-Put assures that proper assembly & orientation for pre-assembled fabrication procedures are followed.
- Saves Money:** Stay-Put customized fastener retention solutions decrease the quantity of assembly tasks required for product fabrication, and reduce the number of product rejects resulting from tedious production requirements.
- Reduces Inventory:** Combining component parts cuts down on paperwork, shipping costs, and saves storage space.
- Saves Time:** Eliminate tedious steps and increase overall productivity with ND Stay-Put.
- Offers Desired Results:** ND has a wide range of materials available to meet your exact application needs, including those that involve ferrous and non-ferrous metals, solvents, oil, gasoline, acids, water, salt, and extreme temperatures. ND's engineering staff will recommend a fastener retention solution to suit your specific fabrication needs.

SPECIFICATIONS

- | | |
|--|---|
| <input type="checkbox"/> Primary usage | Temporary retention of fasteners & other components |
| <input type="checkbox"/> Material | Various polyamides, adhesives, UV curable compounds |
| <input type="checkbox"/> Color | Generally dark brown |
