WWW.BINDERMETAL.COM

Binder Metal Products, Inc. was established in 1925 and has evolved into a full service stamping house, specializing in special stampings as well as most standard washers. We produce a wide range of custom metal stampings in virtually every material available including plastic and phenolic. Size capabilities range from 1/8" diameter to 15" diameter and thickness ranges from .001 to 5/8" thick.

We are a complete tool and die shop as well. Binder Metal also has complete machining capabilities, this gives us the ability to produce much thicker parts, such as spacers, bushings, and other various custom machinings. Binder Metal is a NVLAP accredited laboratory/testing facility and we are ISO 9001:2000 certified.
